Settings for the SteelHead optimization service

http://{device}/api/sh.optimization/1.0/optimization

```
{
    "service_state": string,
    "restart_needed": boolean,
    <prop>: any
}
```

Property Name	Туре	Description	Notes
optimization	<object></object>	Settings for the SteelHead optimization service	
optimization.service_state	<string></string>		Read-only; Optional; Values: running, stopped, stopping, unknown;
optimization.restart_needed	<boolean></boolean>	Some settings may not take effect until the optimization service is restarted.	Read-only; Optional;
optimization. <prop></prop>	<any></any>		Optional;

#### Links

#### optimization: get

GET http://{device}/api/sh.optimization/1.0/optimization

#### Response Body

Returns an optimization data object.

## optimization: stop

Stop the optimization service.

POST http://{device}/api/sh.optimization/1.0/optimization/stop

#### Request Body

Do not provide a request body.

#### Response Body

On success, the server does not provide any body in the responses.

## optimization: restart

Start/Restart the optimization service. Can be used whether the optimization service is currently running or not.

 $POST\ http://\{device\}/api/sh.optimization/1.0/optimization/restart$ 

#### Request Body

Provide a request body with the following structure:

Property Name	Туре	Description	Notes
optimization.links.restart.request	<object></object>		
optimization.links.restart.request. clear_cache	<boolean></boolean>		Optional;

<pre><pre><pre><pre><pre><pre></pre></pre></pre></pre></pre></pre>	Optional;
--	-----------

# Response Body

On success, the server does not provide any body in the responses.
